Automating Code Magnet Generation

Julia Dana

Contents

1 Introduction **1**

2 Development results and future extensions **1**

3 User Guide **1**

4 Developer Notes **1**

1 Introduction

1.1 The Context: What is WAGS?

1.2 The Problem: Brittle Input

1.3 The Solution: Parsing by Grammar

2 Development results and future extensions

2.1 What It Does: Internal Functions

2.1.1 Parses by Grammar

2.1.2 Improved Represention of Magnets

2.1.3 Alternative Magnets

2.2 What It Does: External Functions

2.2.1 Interaction With WAGS Website

2.2.2 GUI Tool

2.3 What It Could Do: Future Extensions

2.3.1 Supporting New Languages

2.3.2 Automatic Generation of Alternative Magnets

3 User Guide

3.1 Quick Start - CLI Tool

3.2 Quick Start - GUI Tool (tent.)

3.3 Explanation of Output

3.4 Automatic Upload to WAGS Website

3.5 Creating Alternative Magnets

3.6 Controlling the Output (tent.)

4 Developer Notes

4.1 The Environment: Languages and Libraries Used

4.2 The Design

4.3 The Configuration: Specifying Magnet Sections

4.4 The Expansion: Adding a New Language
