## **1 Introduction**

### **1.1 The Context: What is WAGS?**

### **1.2 The Problem: Brittle Input**

### **1.3 The Solution: Parsing by Grammar**

## **2 Development results and future extensions**

### **2.1 What It Does: Internal Functions**

#### **2.1.1 Parses by Grammar**

#### **2.1.2 Improved Representation of Magnets**

#### **2.1.3 Alternative Magnets**

### **2.2 What It Does: External Functions**

#### **2.2.1 Interaction With WAGS Website**

#### **2.2.2 GUI Tool**

### **2.3 What It Could Do: Future Extensions**

#### **2.3.1 Supporting New Languages**

#### **2.3.2 Automatic Generation of Alternative Magnets**

## **3 User Guide**

### **3.1 Quick Start - CLI Tool**

### **3.2 Quick Start - GUI Tool (tent.)**

### **3.3 Explanation of Output**

### **3.4 Automatic Upload to WAGS Website**

### **3.5 Creating Alternative Magnets**

### **3.6 Controlling the Output (tent.)**

## **4 Developer Notes**

### **4.1 The Environment: Languages and Libraries Used**

### **4.2 The Design**

### **4.3 The Configuration: Specifying Magnet Sections**

### **4.4 The Expansion: Adding a New Language**

#### **4.4.1 New Grammar Specification**

3

A new G4 file can be added to the system. However, whitespace is required to go on channel 1, or your magnets will not have any whitespace, and you might

get things like “publicclassMyClass”.
